Larisa

This is the document for building the farmer field assurance collection. This isn't signed yet but will likely be today/tomorrow.

Melissa

Hi all.

As we discussed yesterday, I've amended the document.
Here are the points I changed in the document.

1. Added a field for field registration "NRCS field size" -> As Tim mentioned we still don't know if that information can be queried automatically from the NRCS website. In the meantime, we will have this field for the user to input such information
2. Corrected statement in point 4 for triggers and calculations.

Other points we mentioned:

This first phase we will be implementing everything it's described in the document to build the first infrastructure. Once we complete this phase, the next step is to work on AgWorld integration to bring data directly from there, hence avoiding reporting the same data twice. Together with that, we will also work on the Precision king integration to retrieve their data.

Another important point is that we mentioned that we could remove all registration flows from the mobile screens and leave the users to be able to register from the web application only. However, since we plan to add more growers to the program, we want to keep as friendly as possible so we **decided to maintain the registration flow in the scope.**

The new document is attached.

As soon as it's approved, we will start implementing it and I'll be providing timelines.

Luis,
